iDC mini
SUCCESSFUL CASE HIGHLIGHT

嘉華建材
K. WAH CONSTRUCTION MATERIALS

Are you ready to own your iDC mini?

" *DCL is ultimately professional. We are impressed by the promptness of project management despite of short notice period. DCL delivers fast deployment with excellent quality of less than 3 days. We would like to express our sincere gratitude and appreciation for their venerable services.* "

– Andy Leung, Assistant IT Infrastructure Manager

A RECENT SUCCESS

The iDC mini can keep your data safe in many different ways. The single-rack unit has a 6kVA UPS, with a fire protection system and an infrastructure monitoring system to watch over your most critical data. The high-quality manufacturing of the iDC mini ensures that it is extremely efficient and reliable in keeping your data safe.

K. Wah Construction Materials Ltd. (K. Wah) is a wholly owned subsidiary of Galaxy Entertainment Group, a vertically integrated resources company that supplies aggregates, ground granulated blast furnace slag (GGBS), cement, and other downstream building materials, with a strong focus on creating value in a sustainable manner.

K. Wah chose to use iDC mini (2 racks solution with one cooling unit) at the branch office in Kowloon Bay. It is the best solution to support the branch because it is highly mobile and reliable. Their main site is located at Tai Po with their standard server room also built by DCL.

Q: What are your comments about the setup of the iDC mini?
A: This is an excellent solution with low setup cost and fast deployment. Since our site in Kowloon Bay is small, it perfectly fits our simple site preparation requirements.

Q: How do you feel about the outlook and presentation of the iDC mini?
A: The appearance looks smart and rigid. I particularly like the rack from Germany which is durable and demonstrates high coefficient of performance and reliability.

Q: Do you think the iDC monitor helps in remote site monitoring?
A: It really helps in achieving better planning and trouble-shooting. The software – iDC CMS is very user-friendly. I can view the status and mapping of main computer room and hub room anytime and anywhere just with my iPad.
