

The Evolution of Datacenter Protection and Management

- An affordable yet practicable DCIM solution especially for Hong Kong situation
- A brand-new way to build up a green and reliable datacenter by segmentation methodology

How can you improve your datacenter effectiveness and efficiency?
How can you watch over the physical security of your datacenter?
How can you save the operating costs of your datacenter?
How can you secure the reliability and availability for your datacenter?
How can you ensure operational resiliency in support of SLAs without a DR site?

Are you looking for the solutions of above questions? Come and join our workshop.

28 Sep 2017 (Thursday)
14:30 - 17:00

Rm1206-08, Nanyang Plaza, 57 Hung To Road, Kwun Tong

Agenda

- 14:15 - 14:30 Registration
